

Key Selling Points

EM151 replacement

The EM152 differential pressure manometer replaces the EM151 with additional features and the same professional accuracy. Even though the EM152 offers differential pressure it is not a competitive option to the EM201B's higher accuracy.

Professional enhancements

The EM152 offers the same features as the previous model with nice upgrades besides the dual input differential. The range was increased to -60 to +60 in H₂O (from -20 to +20 in H₂O). Users now have 11 scales to choose from, over the 3 scales in the previous model. The EM152 also features an easy-to-read high contrast backlit display, MIN/MAX, and a built in magnet for hands-free work.

Feel good factor

The boot was replaced with over molding and a secure grip handle that fits better in the hand and offers additional protection and reliability in tough workspaces.
