

Choose the Best BluVac Micron Gauge for your needs

	BluVac+ Professional	BluVac+ LTE	BluVac+ Micro
Vacuum Resolution in microns (0 to 1000 Microns)	0.1	1	1
Vacuum Resolution in microns (1000 to 10,000 Microns)	0.1	1	10
Vacuum Resolution in microns (10,000 to 25,000 Microns)	1	10	100
Ambient Temperature Display	X	X	
10 Level Bar Graph Analog Pressure Indicator	X	X	
Alarm	X		
Programmable (pressure)	X		
Programmable (time)	X		
Rise Time Analyzer	X		
Leak Rate Indicator	Microns/Min or Microns/Sec		
Saturation Temperature Display	X		
Evacuation Progress Indicator	X

COMMON SPECIFICATIONS across the entire BLUVAC family

- * All BluVacs cover a vacuum range of 0.0 to 25,000 Microns and come with vacuum gauge coupler.
- * All units have BlueTooth connection capability for App Connection (BluVac app)
- * Each unit has the same Vacuum Accuracy of 5% of Reading +/- 5 Microns.
- * They are durable due to the operating temperature range of -10°F to 122°F and a maximum overpressure
- * Each one is and easy to use as the warm-up & response time are Instantaneous.
- * The clever 4 level bar graph battery level indicator & blue backlight make reading a snap.
- * All models have advanced power management with a sleep mode and auto power-off.
- * Never worry about performance as each unit has a calibration self-test and self diagnostics for damaged or missing sensors, proper calibration, oil contamination) as well as being field calibrateable
